

Training Package on Digital Citizenship

One of the main results of the Digi-Civis project is the creation of a comprehensive training package on digital citizenship. This **free online course**, available in six languages (English, Italian, French, Spanish, Romanian, Latvian), is designed for teachers of all grades and subjects.

The course covers critical aspects of **digital citizenship**, including digital footprint, digital communication, digital literacy, digital etiquette, digital law, digital rights and responsibilities, digital consumerism, digital wellness, and digital security.

The training package features a well-thought-out instructional design with practical topics, additional readings, exercises, self-assessments, and best practices. The course aims to **enhance teachers' understanding and confidence in digital environments**, providing resources that can be used and replicated in classrooms.

Trainig modules

As part of the training package, the partners have developed six modules designed to enhance teachers' digital competencies. These are the modules:

0. Introduction: Basics of Digital citizenship in the EU
1. The Digital Ecosystem and the Digital Citizen
2. Safe Online Navigation
3. Ethical Online Communication
4. Critical Evaluation of Information
5. The Digital Consumer
6. Time Management and Digital Well-being
